

ASUS Chromebox for Meetings

Exclusive to you

Fast, secure and easy to manage the ASUS Chromebox for meetings includes everything you need to equip a conference room for video calls except the display.

Powered by a 4th Generation Intel® Core™ i7 processor, it includes a 1080p HD camera with an autofocus lens and the ability to switch resolution based on available bandwidth. For audio, it has a combination omnidirectional microphone/speaker with mute, end call, and volume buttons. To navigate the Hangout interface, there is an RF based remote control with a full keypad. The Asus Chromebox for meetings package includes the first year's management and support license, which is activated once you enroll the device by signing in with a domain account. Then anyone with a gMail account can join.

Wireless

The powerful ASUS Chromebox for meetings makes it the perfect solution for businesses, schools or the public sector. ASUS Chromebox for meetings has the usability of Google+ Hangouts and the collaborative power of Google Apps for highly productive high-definition video conferencing. Google's user-centric approach simplifies things so you can set up meetings in minutes.

Setting up the device for use in the conference room can be accomplished in minutes. Physical installation is straightforward and the box includes hardware for wall mounting if needed. Once the physical setup is complete and the Chromebox is connected to your network, the device is ready to be enrolled.

You can then meet with anyone, anywhere on any device – from the conference room, at home or on the road. Join meetings with up to 15 participants – meet with colleagues or invite customers and partners. One click from your remote starts the conversation – no more clunky dial-in codes. Share your screen wirelessly and collaborate on documents while you meet.

- Faster and easier collaboration
- Communicate with other office locations
- Meeting with partners and customers around the globe
- Hosting virtual events like webinars and forums

Bringing high quality, affordable video meetings to any room with Chromebox for Meetings!
